

EMIRI

2017 ... A year of achievements

Thanks to our members & contributors as well as the excellent relationship with EU Commission DG R&I and Member States, we can be proud of these achievements in 2017:

- 1 About 275 million euro are allocated to advanced materials for clean energy & clean mobility in Horizon 2020 work programme for the period 2018-2020
- 2 A possible top-up of 100 million euro could be allocated to advanced materials for clean mobility in 2018 (for 2019-2020 calls)
- 3 EMIRI is recognized by EU Commission and Member States as the key platform on advanced materials for clean energy & clean mobility (we are active in EU Commission's SET plan, EuroNanoForum, Industrial Technologies, Mission Innovation, Industry Days)
- 4 Interactions with various key EU stakeholders active in clean energy, clean mobility, industrial policy, circular economy are growing and reinforcing EMIRI as a key platform
- 5 EMIRI is well positioned to promote members' key topics in FP9 in frame of Missions

In 2018, we will further promote the enabling role of EU-based industry of advanced materials in accelerating the transition to clean energy & clean mobility while delivering growth & jobs opportunities for European citizens ... Join us in this Mission.
